EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Michael Musella (Reg. 39,310) on 3-11-2009. Applicant's representative, Michael Musella, agreed to the following changes without prejudice:

In claim 20, line 2,

the phrase "Broadcast/Multicast Service" has been changed to

--Broadcast/Multicast Service--.

In claim 20, line 6,

the phrase "an MBMS" has been changed to

--a MBMS --.

In claim 20, line 6,

the phrase "a PMM Idle state" has been changed to

--a Packet Mobility Management-Idle (PMM-Idle) state --.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:
upon close review of the claims, the prior art, and applicant's remarks in the After Final Amendment filed on 2-10-2009, it appears that the allowance of claims 1, 3, 4, 6, 10-12, 15-17, 20, 22, 24-26, 28, 30-33, 35, 38, 39, 42, 43, 45, 46, 49, 50 are appropriate.

The prior art of Sarkkinen, used in the outstanding office action, discloses a UE in a RRC idle mode transmitting signaling messages to complete joining at least one MBMS service rather than transmitting MBMS service-related information of a UE that is in a RRC connected mode and a PMM-Idle state after joining at least one MBMS service. Therefore, Sarkkinen does not meet the requirements of the claimed invention.

Further, it would be contrary to the teaching in Sarkkinen to transmit MBMS service-related information of a UE that is in a RRC connected mode and a PMM-Idle state after joining at least one MBMS service since Sarkkinen provides a UE in a RRC idle mode establishing connection with another core network to join a MBMS service without involving communications between the UE and a radio network controller.

The reference of Kim, discussed in the outstanding office action, discloses transmitting MBMS (Multimedia Broadcast/Multicast Service) service-related information of a UE (User Equipment) that is in a Radio Resource Control (RRC) connected mode after joining at least one MBMS service rather than transmitting MBMS service-related information of a UE that is in a RRC connected mode and a Packet Mobility Management-Idle (PMM-Idle) state after joining at least one MBMS service.

Art Unit: 2614

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
